

Vulcanite Pty Limited

QUALITY POLICY STATEMENT

The fundamental objective of Vulcanite Pty Limited is to partner with our clients to:

- provide excellence in engineered rubber solutions;
- to continuously pursue best practice in project management; and
- research & development and commercialisation of innovation.

Vulcanite will constantly improve its services to meet and exceed customer and industry expectations with absolute integrity, in order to expand and prosper the business for the benefit of our customers, employees, suppliers, shareholders and all other stakeholders.

Implicit in this objective is a competitive strategy for continuing improvement in quality, safety and efficiency directed at customer satisfaction and a minimisation of waste in the form of variation, rework, environmental impact and other non-value adding activities.

It is our policy to promote an environment and culture which challenges, encourages and empowers all employees to pursue and be accountable for ongoing improvement in quality and productivity of processes, products, delivery and services throughout our own operations, our suppliers and our distribution network. We plan and seek stakeholder input to identify changing needs and apply our expertise and technical resources to surpass customer expectations.

Vulcanite will maintain and continually improve quality management systems within the framework of the International and Australian Standard ISO9001 - Quality Management Systems - Requirements.

Howard Johnson
Chief Executive Officer
Vulcanite Pty Limited
